

COLLABORATIVE CLASSROOM COACHING

Sequential
Development
Consulting

SDC consultants work alongside teachers in the classroom to support real-time implementation of social-emotional, behavioral, sensory integration, and regulation strategies. The goal is to help teachers strengthen routines, transitions, co-regulation, classroom systems, and child-specific support through a developmental lens. SDC consultants will provide in-the-moment coaching, modeling the implementation of strategies, and real-time behavior interpretation in partnership with teachers.

CONSULTATION CAN FOCUS ON CONCEPTS SUCH AS:

- Modeling co-regulation, emotional language, and supportive responses
- Child-specific strategy planning
- Developmental interpretation of challenging behavior
- Small-group or whole-class SEL experiences, such as:
 - Facilitate classroom activities
 - Introduce Zones of Regulation to the classroom
 - Introduce Kimochis to the classroom
- Support building shared language around regulation, relationships, and behavior
- (insert your idea here) 😊
