

# Making Classrooms Connected

Our mental health clinician comes on-site to observe the classroom and partner closely with the teaching team to strengthen connection, communication, and relationships within the group. This service focuses on supporting individual children for whom the school aims to enhance emotional safety and relational attunement—while also elevating the overall relational climate for all current and future students

Step 1: Teacher completes a form that provides us with the information we need prior to the on-site observation.

Step 2: Mental Health Clinician comes on-site to observe the classroom and the student (s) for whom the school aims to make the classroom more connected.

Step 3: The MFT will provide the teaching team with a report that includes strengths and recommendations.

Step 4: The teaching team can schedule a 1 hour Zoom consultation with the MFT to review and clarify the content in the report.

**\$850 per  
classroom**
